PROFESSIONAL SUMMARY

Full-stack Web Developer with 3+ years of experience building scalable software solutions and user-focused applications that drive real-world impact across diverse business needs. Proficient in JavaScript, React, Ruby on Rails, SQL, Git, and low-code tools, with a strong command of all stages of the development lifecycle. Proven ability to deliver performance-optimised web applications, re-engineer existing systems, and collaborate closely with clients to translate requirements into robust technical solutions.

WORK EXPERIENCE

IT Systems & Support Engineer

Mugambi Ndirangu Foundation

 Nairobi, Kenya  March 2025 – Present

- Managed end-to-end IT systems setup and maintenance, including computer configuration, OS installation, and deployment of productivity and operational software.
- Monitored application performance, identified bottlenecks, and resolved technical issues across distributed systems to maintain 99%+ uptime.
- Administered and maintained organisational databases, ensuring accurate data entry, validation, storage, retrieval, and reporting of foundation records.
- Oversaw data input/output workflows, identifying inconsistencies and implementing process improvements to reduce errors and operational bottlenecks.
- Provided technical support and consulting for staff, clients, and visitors, including onboarding/offboarding, system access setup, and device configuration.
- Served as primary point of contact for IT troubleshooting, resolving hardware, software, and data-related issues to minimise downtime.

Web Developer

Henga

 Nairobi, Kenya  September 2024 – May 2025

- Designed, coded, and implemented new product features, contributing to innovation and expanded functionality.
- Developed, optimised, and maintained websites with a focus on performance enhancements and user experience.
- Re-engineered existing systems and workflows, improving efficiency, scalability, and maintainability.
- Leveraged in-house low-code tools to rapidly develop and deploy client solutions, enhancing service delivery.
- Managed client communications across email, phone, and chat, resolving technical and product-related issues while maintaining high client satisfaction.
- Created comprehensive technical documentation and provided ongoing support to ensure smooth software operations.
- Gathered client feedback and translated requirements into technical specifications, fostering strong client relationships.

Web Developer Intern

Italanta

 Nairobi, Kenya  January 2023 – March 2023

- Developed dynamic and responsive websites using JavaScript and Angular, enhancing frontend functionality and user experience.

- Identified, reported, and contributed to resolving security vulnerabilities as an open-source bug bounty contributor, improving software reliability and safety.
- Gained hands-on experience in modern web development frameworks and security best practices, strengthening coding skills and problem-solving abilities.

EDUCATION

Certificate in Software Engineering

Moringa School (Boot Camp)

 Graduated 2023

Intensive full-stack development programme covering modern web technologies, API development, database management, and software engineering best practices. Completed hands-on projects involving system integration, API consumption, and distributed application development.
